Metal Letters & Logos

Signs Visual fabricates custom metal letters and logos in aluminum, stainless steel, brass, bronze, and copper. Finishes available include: brushed satin, mirror-polished, non-directional, random orbital, anodized, oxidized, baked enamel painted, powder-coat painted, and specialty finished.

Acrylic Letters & Logos

Signs Visual creates exquisitely sharp and precise laser cuts of high quality plastics and acrylics. Our custom formed acrylic letters and logos feature spot on color paint matching and fine polished edges. We can cut most thicknesses up to 1 inch and spray any Pantone color to reproduce your branding faithfully.

Etched Glass Signage

Signs Visual can produce fine breathtaking glass and plexiglass signage. These signs can be clear, frosted, tinted with polished or beveled edges and are typically mounted with high quality stainless steel standoffs. Graphics can be etched and paint filled or cut from a premium film laminate with unlimited options.

Etched Metal Signage

Signs Visual leads the industry in distinct etched metal signage and plaques. Our plaques are acid etched and paint filled to your specs on a variety of metals including aluminum, stainless steel, brass, bronze, and copper. Each plaque can capture intricate designs, unique logos, and detailed lettering in your message.

Cast Metal Plaques

Signs Visual produces luxurious looking cast metal plaques. These plaques are casted using high temperature melted heat. The look is of permanence and distinction. Graphics are typically raised in a satin or polished metal surface with the background recessed in a painted dark textured background.

Custom Vinyl Graphics

Signs Visual creates beautifully reproduced vinyl graphics for wall and window applications. With a wide variety of colored films available including gold leaf, metallic, translucent, and opaque, these type of graphics are widely used in all corporate and retail branding environments.

Frosted Film Graphics

Signs Visual makes frosted film graphics, distraction markings, privacy banding, and etch-look lettering onto your glass paneling whether it be a glass window or conference room glass partitioning. The frosted film application is very clean, crisp and cost effective for achieving an etched glass effect with a better budget.

Laser Engraved Plastic Signs

Signs Visual is one of the first manufacturers of laser engraved plastic signage. These plastic signs are available in almost any color including metallic colors and are finely etched and detailed. Because laser etching is very precise, we can handle any complex logo and small typeface lettering. Also a great alternative to metal.

Silk-Screened Signage

Signs Visual can capture your corporate identity with silk-screen imprint technology. This method is a great solution for volume and quantity orders where consistency is key. The surface of the sign is imprinted thru a mesh screen in any paint color you desire. The end result is of high caliber and prestige.

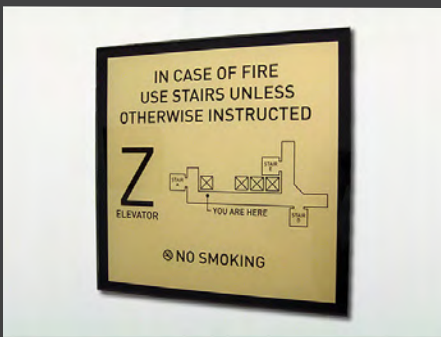

ADA Signs

Signs Visual fabricates ADA interior signage for all types of environments. All our ADA signs meet the American with Disabilities Act standards and practices. These signs can be custom routed, engraved, formed, printed in many plastics and metals with corresponding symbols and braille to complete your interior signage program.

Signs Visual creates your wayfinding signs with extreme detail and perfection. Our wayfinding signs are used for buildings, schools, hospitals, offices, and more. These signs can be custom manufactured to feature your logo and colors for a consistent theme from building directory signs to evacuation map egress signs.

Halo-lit / Backlit Logos

Signs Visual uses the highest quality illumination for your backlit / halo-lit logos and letters. We use extremely bright and powerful LED lighting modules to illuminate the inside backs of these fabricated metal letters and logos. These type of signs can be back-lit in any assortment of LED colors including white.

Thank you for taking a look. Now, are you ready?
